

Vectec Eclipse

Web Based Fuel Management

“The Vectec ECLIPSE gives you LIVE fuelling information, when and where you want it, at an affordable price”.

Reduced Cost Upgrade to Existing Systems ...

At a time when cost savings are vital, Vectec also offer a cost effective retrofit solution to many existing fuel management systems.

Replace the door and enter a new generation of fuel management !.

Simple Retrofit to existing systems

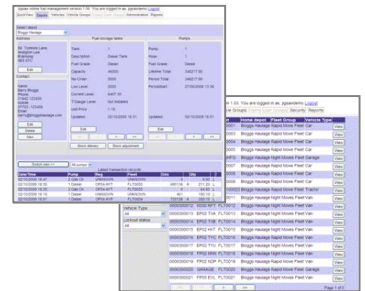

Move From Once a Day to All the Time !

Because the system is linked directly from the fuel island to the web site, there is no need for daily polling – all information is updated as it happens.

Just Some of the Benefits :

- ✚ All Fuelling Data displayed immediately on the Internet
- ✚ Stock Figures are always current
- ✚ Allows centralised control and overview of stock purchasing
- ✚ Immediate Low Stock warnings
- ✚ Immediate Notification of Pumps Disabled

Time can make a small problem into a crisis – stay on top with **live** information !

**Web Based Reporting
– Viewable Anywhere,
Anytime !**

Live Information gives Enhanced Security

Because the system uses mobile phone technology, the terminal can send texts and e-mails directly to on site staff.

Just Some of the Benefits :

- ✚ Immediate Notification of Attempted use of Blocked or Stolen Keys
- ✚ Immediate Text Alarms raised on Tank Stock Theft
